The industrial solution for manufacturers in the chemical industry

casychem

casyChem joins a variety of modules for use in the chemical industry, developed in close collaboration with our customers.

The GMP-compliant way of working is supported. Official requirements are covered (IFRA, REACH, VOC, etc.). It is also possible to print safety data sheets or end product labels.

Experience is our competence **casymir.com**

CASYMIR

With our long industry experience, we have developed CASYCHEM, an ERP software that is tailored to the requirements of companies in the Chemical industry. CASYCHEM offers a transparent representation of the entire process chain in all operational areas and is consequently batch-oriented. Certifications according to GxP, GAMP V, IFRA, REACH, VOC, FDA and other national regulations are possible and have been already implemented by our customers.

GHS module integrated

HIGHLIGHTS

- Validatable system
- Stability database for the validation of product stability
- Calculation of product properties such as the degree of compliance
- Active substance and substance database
- Possibilities for dangerous goods and dangerous goods classification
- Printing of safety data sheets or end product labels (GHS compliant)
- Hazardous substance classification (GHS) and support for dangerous goods (UN)
- Safety data sheet, certificate of conformity

RELEVANT FUNCTIONS

- Validatable system
- Traceability of all data and processes
- Recipe management
- Flexible creation and management of certificates
- Ingredients, properties, areas of application of articles
- Acquisition and management of measurement data
- Easy management and documentation of free goods
- Flexible control of production facilities
- Ingredient management
- Support for order and stock production
- Calculation of product properties
- Integrated LIMS functions

- Stability database for product stability monitoring
- Secure product related warehouse management
- Maintenance of production facilities
- Multilevel production and release procedures
- Deposit of specifications
- Continuous traceability in all relevant areas
- Consistent workflow management
- Country- and customer-specific labeling with barcode GS1-128 (EAN)
- Batch traceability and quality management
- Customs Interface for Import and Export (CH)
- Complaints management
- Depiction of by-products
- Integrated weighing system
- Revision and release security
- Integration of document management systems
- Consignment stock and foreign production
- Audit Trail
